

# Evaluation of Legislation in Hungary – Approach, System and Methods

Lóránt Csink  
Pázmány Péter Catholic University

# Decision-making process

If only we  
go to the  
sea!

Let's go to  
Italy!

Accommodation,  
travel,  
programs,  
packing,  
sandwiches, etc.

# What is necessary for legislation?

- Vision – defining long-term goals upon value choice
- Strategy – defining the tool to achieve long-term goals
- Execution - administration

# Approach and Method

1. Defining the target – what do we really want?
2. Evaluation
  - a) What is the effect of legislation?
  - b) Any side-effects? (legal, political, social)
  - c) Applicable to the society? (use of comparative law)
  - d) Where and how to apply?
3. Defining the tool
  - a) Non-legal (advertisement, literacy, education)
  - b) Legal (legislation, law-enforcement, self-regulation)

# Principles of law-making

- Highest efficiency – to achieve the goal of the "vision"
- Least intervention (Occam's razor) – if the goal can be achieved in more than one ways, choose the least possible interruption
- Indulgence of the legal system (subsidiary)

**Thank you for your  
attention!**
